

Flush Mount Album Design

Flush mount means that the images extend to the edge of the page on all sides

- I offer fully customized album design for any available album size
- When choosing photos, allow approximately 4-7 main images per spread, plus a variety of "filler" images for backgrounds (a spread is composed of 2 side-by-side pages; first and last pages = 1 spread)
- I will arrange the photos artistically on the spreads; images can be grouped as a series on any spread (please indicate the photos that are to be in a series)
- Color correction and basic retouching of photos is free
- Extreme editing (such as removal of objects) or special effects incur additional art charges at \$35.00 per hour
- Black and white and sepia tints are no extra charge
- Typography (text, such as first names, location, date, quote, etc.) included on up to 50% of the pages at no charge
- 50% deposit required on all album orders; balance due before delivery
- Free online proofing of the album design
- One revision free of charge per 3 spreads / additional revisions \$10 each
- Approximately 12 to 14 days for completion of most album designs (extremely complex designs or large albums will take longer)

DESIGN COSTS:

- If you order the minimum number of spreads per album: cost is \$22 per spread
- Anything above minimum number of spreads: \$20 per spread
- Cost of album is in addition to album design costs
- Cost of album includes printing, binding, page coatings, and boutique packaging
- Delivery/shipping costs will be calculated separately

*Flush mount albums are the most popular style albums available today. See Miller's Professional Imaging website for other available album styles.

<http://www.millerslab.com/info/products/proddef.aspx>

Traditional albums are also available from other sources. You can choose an album style that features just one size photo per page, or an album style that has multiple and/or shaped mat openings per page for your prints. Please contact the studio for details and pricing:
